HPE 1200W Common Slot Platinum Plus Hot Plug Power Supply Kit (656364-B21)

What's new

- Lower-cost 460W, 750W, 1200W Platinum, and 1500W -48 VDC power supply options for ProLiant Gen9, Moonshot, and ProLiant Gen8 servers.
- Hot-swappable, tool-less installation for HPE servers and storage solutions.

Overview

Looking to reduce energy cost and space with increased performance?

HPE Common Slot Power Supplies share a common electrical and physical design that allows for hot-swap, tool-less installation into HPE server and storage solutions. These server power supplies are available in multiple, high-efficiency input and output options, allowing you to "right-size" a power supply for specific server/storage configurations and environments. This flexibility helps to reduce power waste, lower overall energy costs, and avoid "trapped" power capacity in the data center.

The power supplies provide the IT industry's highest level of power efficiency (up to 96%), helping users to reduce power requirements per server and reducing overall data center power requirements. The Platinum Plus and Titanium power supplies also enable HPE Power Discovery Services which focus on increasing compute density while reducing data center outages.

Features

Best in Class Power Supply Technology

HPE Common Slot Power Supplies are designed to simplify the serviceability and maintenance of power supplies across the HPE portfolio of server and storage products by being hot-swappable and providing a tool-less installation.

Multiple power management options deliver greater power efficiency when using redundant power supplies to reduce overall power usage.

Multiple input and output options deliver increased flexibility in usage while reducing the chances of creating "trapped" power capacity in the data center.

HPE Common Slot Power Supplies have Titanium level certification by both the 80Plus program and the EPRI providing the highest level of power efficiency (up to 96%) in the IT industry.

Higher-end power supplies offer HPE Power Discovery Services that help customers reduce human error during the installation process, reclaim over-provisioned power capacity in the data center, and accurately measure/monitor power usage.

Technical specifications

HPE 1200W Common Slot Platinum Plus Hot Plug Power Supply Kit

Product Number	656364-B21
Power supply type	Common Slot
Input voltage	100V - 240V AC
Power output	1200W
Efficiency	94%
Product dimensions (metric)	3.81 x 8.63 x 19.05 cm
Weight	1.36 kg

For additional technical information, available models and options, please reference the QuickSpecs

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
